Single Sign-On Experience with Slack
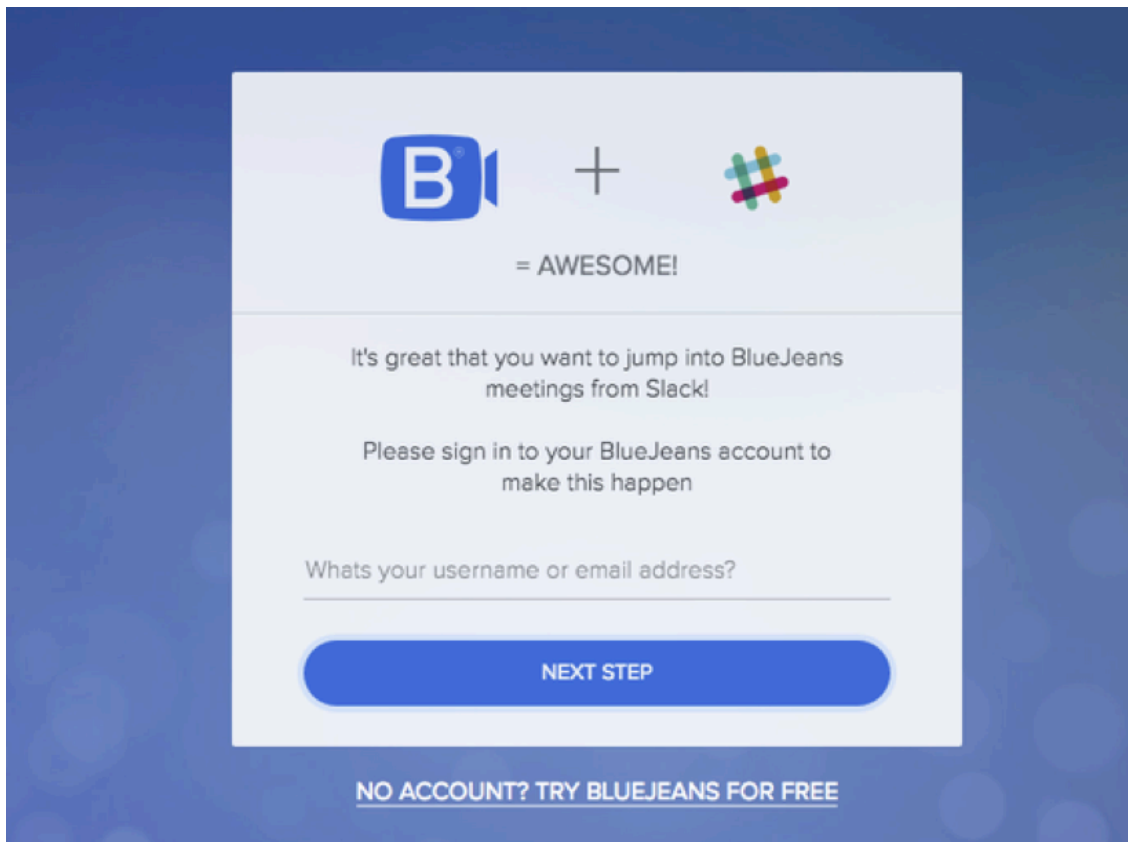

Updated: July 1, 2016

BlueJeans

SSO Experience with Slack - Step 1

To initiate or participate in a BlueJeans meeting from Slack users will be prompted to sign in to their BlueJeans account.

User will be redirected to their Company's Login Page

Note: similar experience for HipChat

It's great that you want to jump into BlueJeans meetings from Slack!

Please sign in to your BlueJeans account to make this happen

Whats your username or email address?

SSO Experience with Slack - Step 2

This would be the Company's branded SSO login page, for example of Acme enterprise.
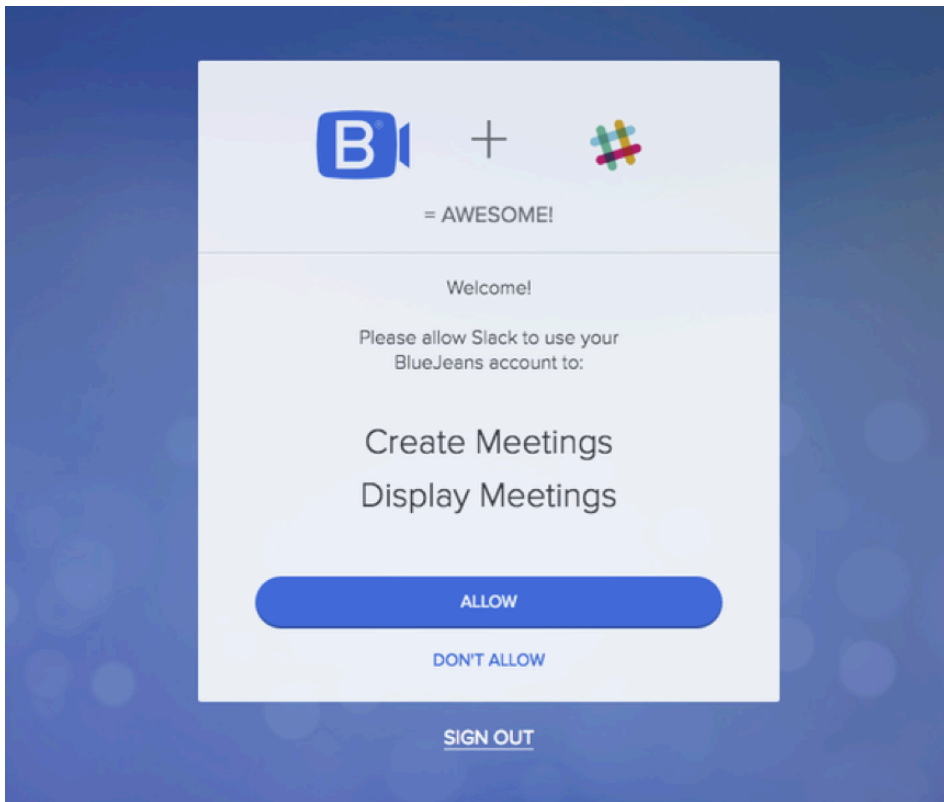

User enters their corporate credentials

ACME

Username (Kerberos ID)

Password (PIN + token)

Log In

NOTE: You must close your browser or clear your cookies to completely log out.
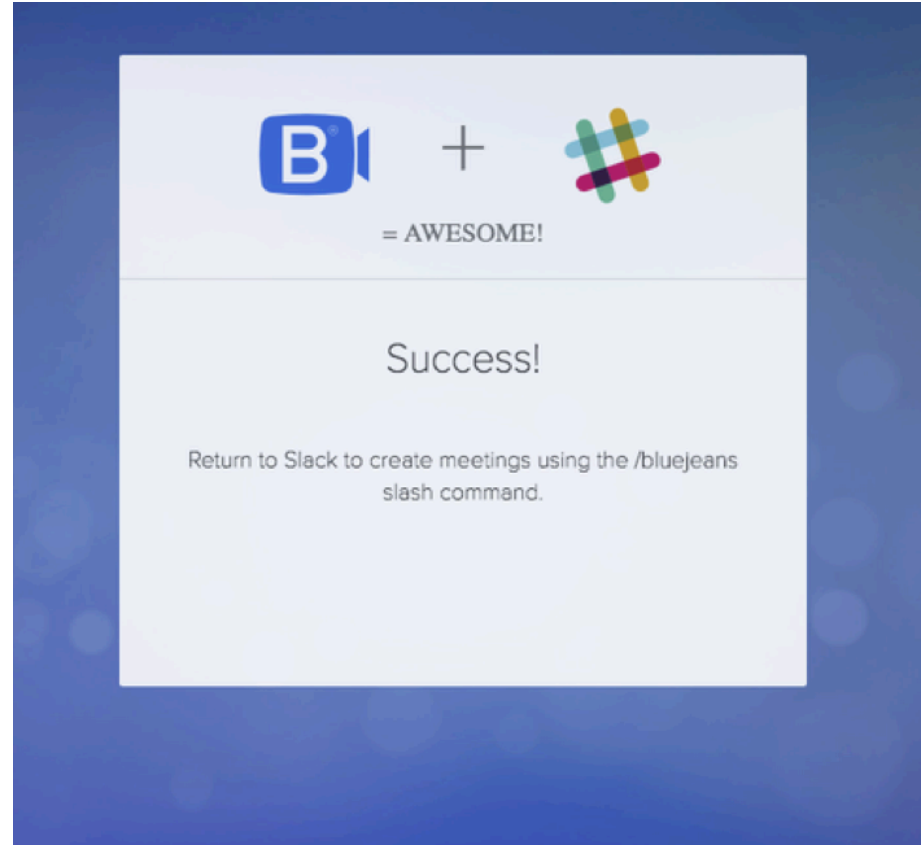

SSO Experience with Slack - Step 3

User is prompted to "allow" Slack to have access to:

- Create Meetings

- Display Meetings

BlueJeans

SSO Experience with Slack - Step 4

User is prompted to return to Slack to initiate meetings using the slash command: /bluejeans
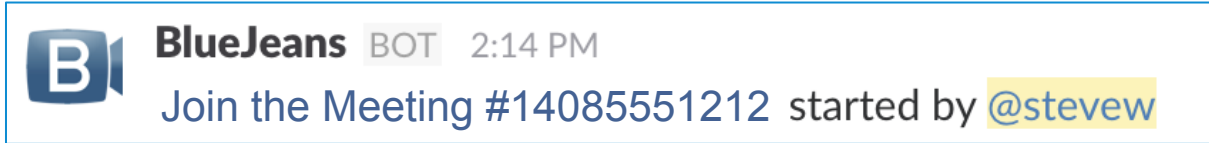

Initiating a BlueJeans meeting within Slack
Slash commands- 3 Options Desktop or Mobile

1) /bluejeans
   This creates a meeting link in Slack using your personal meeting ID

2) /bluejeans *meeting name*
   This creates an ad hoc meeting with a unique meeting ID

3) Invite offline or external participants, for example:
   /bluejeans *personxyz@company.com* OR
   /bluejeans *meeting name personxyz@company.com*
   Invites people by sending an email invite to personxyz to join the meeting
